gEHRiMed™ LTC Physician-Designed Portable EHR

Industry-leading gEHRiMed is the first Stage-2-Certified EHR designed exclusively for LTPAC medical providers. The cloud-based software helps reduce errors to deliver more accurate clinical assessments, all while increasing physician productivity. By coupling real-time data capture with custom practice management tools, gEHRiMed simplifies the workflow for the multi-provider, multi-location practice.

Powerful Benefits:

Never fear data loss.
Cloud-based solutions. Enjoy on-demand access to shared patient information anytime, and anywhere.

Eliminate unsecure messaging.
Secure Internal Messaging. Stay connected and continue collaboration with your colleagues with our secure HIPPA-compliant messaging system.

Get paid faster.
CPT Code Protection: Place-of-Service Aware. We know where you are going and which codes can be used. gEHRiMed's intelligent coding system helps reduce the likelihood of selecting the wrong CPT code and ultimately sending an incorrect bill - shortening the billing cycle.

Earn incentives.
Built-in Meaningful Use. 2016 is the last year providers are eligible to receive over $21,000 from Medicaid for signing up for a certified electronic medical record. gEHRiMed provides bult-in features needed for qualifying to receive Stage 2 Meaningful Use reimbursement.

Design your workflow.
Customizable Templates. gEHRiMed offers customizable, practice-specific templates that recognize how you work. We want our EHR to work best for you.

Talk to text.
Dragon Medical® Integration. Accurately translate your voice into detailed clinical notes. The clinical speech recognition solution feeds directly into our EHR, to help capture complete clinical assessments and reduce charting time.

Avoid penalties.
PQRS Integration. gEHRiMed equips you with the tools necessary to avoid losing thousands of dollars in PQRS-related penalties. Our activated PQRS alerts notify the provider when the patient qualifies for further evaluation and when the provider should take action.

Protect your data.
EHR Security. Our cloud-based software includes Data Backups every 15 Minutes, Dual Authentication and Encryption features. gEHRiMed's security features will safeguard your patient health information, prevent unauthorized users from accessing patient records, and log user activity –tracking every click down to the second.
