Introducing

gEHRiMed™ + matrixcare
Superior Care. Better Outcomes.

Integrated Services. gEHRiMed and MatrixCare provide medical clincians with a more comprehensive and secure solution to help enhance clinical decision making through interoperable patient data. The integration helps streamline the documentation process by allowing clinicians to chart in one application, while updating the patient electronic health record simultaneously in both the gEHRiMed and MatrixCare applications. For more information visit: **www.gEHRiMed.com/contact/**

Powerful Benefits:

2017 MIPS - Ready Platform

If you are part of a long term/post-acute care (LTPAC) medical group, it's almost certain that you will be subject to the Merit-Based Incentive Payment System (MIPS) starting January 1st, 2017. The new MIPS program leverages and augments PQRS, Value-Based Modifier (VBM) and Meaningful Use rules; replacing existing Medicare quality/cost reporting programs. We're prepared...are you?

Quality   **Resource Use**   **CPIA**   **ACI**

Eliminate Identity Errors

Shared Patient Identification. Real-time interoperable patient data ensures both providers & facilities have the most up-to-date patient information. We reduce the need to share patient information via phone calls and faxes, which can lead to insufficient and inaccurate data.

Say 'Goodbye' to Face Sheets

Automated Patient Data. Now it's easier than ever to get the information you need. Patient information from the facility is seamlessly integrated with gEHRiMed's Census Manager. Practices no longer have to waste time tracking down patients' insurance information.

Avoid Penalties

PQRS Integration. gEHRiMed equips you with the tools necessary to avoid losing thousands of dollars in PQRS-related penalties. Our activated PQRS alerts notify the provider when the patient qualifies for further evaluation.

Earn Incentives

Built-In Meaningful Use. gEHRiMed provides built-in features needed for qualifying to receive Stage 2 Meaningful Use reimbursement. 2016 is the last year to receive $21,250 per provider through the AIU program.

Get Paid Faster

CPT® Code Protection: Place-of-Service Aware. We know where you are going and which codes can be used. gEHRiMed's intelligent coding system helps reduce the likelihood of selecting the wrong CPT code and ultimately sending an incorrect bill - shortening the billing cycle.

Talk to Text

Dragon Medical® Integration. Accurately translate your voice into detailed clinical notes. The clinical speech recognition solution feeds directly into your EHR, to help capture complete clinical assessments and reduce charting time.

Remove Unsecure Messaging

Secure Internal Messaging. Stay connected and continue collaboration with your colleagues with our secure HIPAA-compliant messaging system.

ePrescribing

eRx Software. Directly access integrated ePrescribing software to manage patient medication lists, allergy lists, and to prescribe non-controlled and controlled medications.
