

## July Release Notes – 07/30/2018

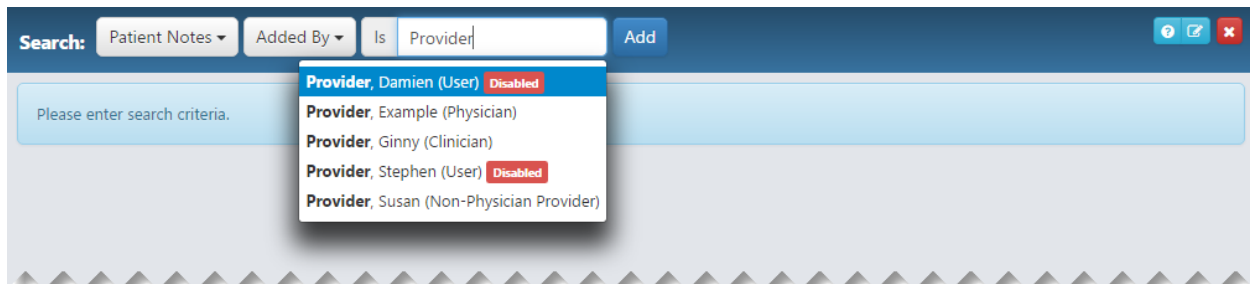

### Feature Updates

#### Group Details - Group Report Email

Administrators may now clear the Group Reports email field if they no longer want Group Reports delivered.

#### Advanced Search - Clinician Search

The clinician search values in GEHRIMED Advanced Search for the Added By criteria (available for the Patient Notes and Patient Problem List categories) are now type-ahead search fields that display new information.

Search results will display Lastname, Firstname (User type) in alphanumeric order.

#### Encounter - Vitals Entry

Vitals entries of '0' will now appear on the encounter note once signed.

**NOTE:** The 'Height' field may not be '0'.

#### Encounter Card

The Encounter Card will now display Encounter numbers to 12 places.

#### Problem List

Behavior that caused all refined versions of an ICD code to populate in a patient's problem list has been corrected.

#### ICD H81.09 : Ménière's Disease

ICD Codes that include special characters will no longer create an error when a user attempts to refine the ICD.
