# Patch Notes – Dec. 18, 2019

Issues Addressed

- Performance improvements to Promoting Interoperability calculations have been implemented in GEHRIMED.
- The numerator for Medicaid PI Objective #5 (Patient Electronic Access to Health Information) will now be incremented by any clinician in a group that confirms they provided Patient Electronic Access to Health Information for a patient in the denominator.
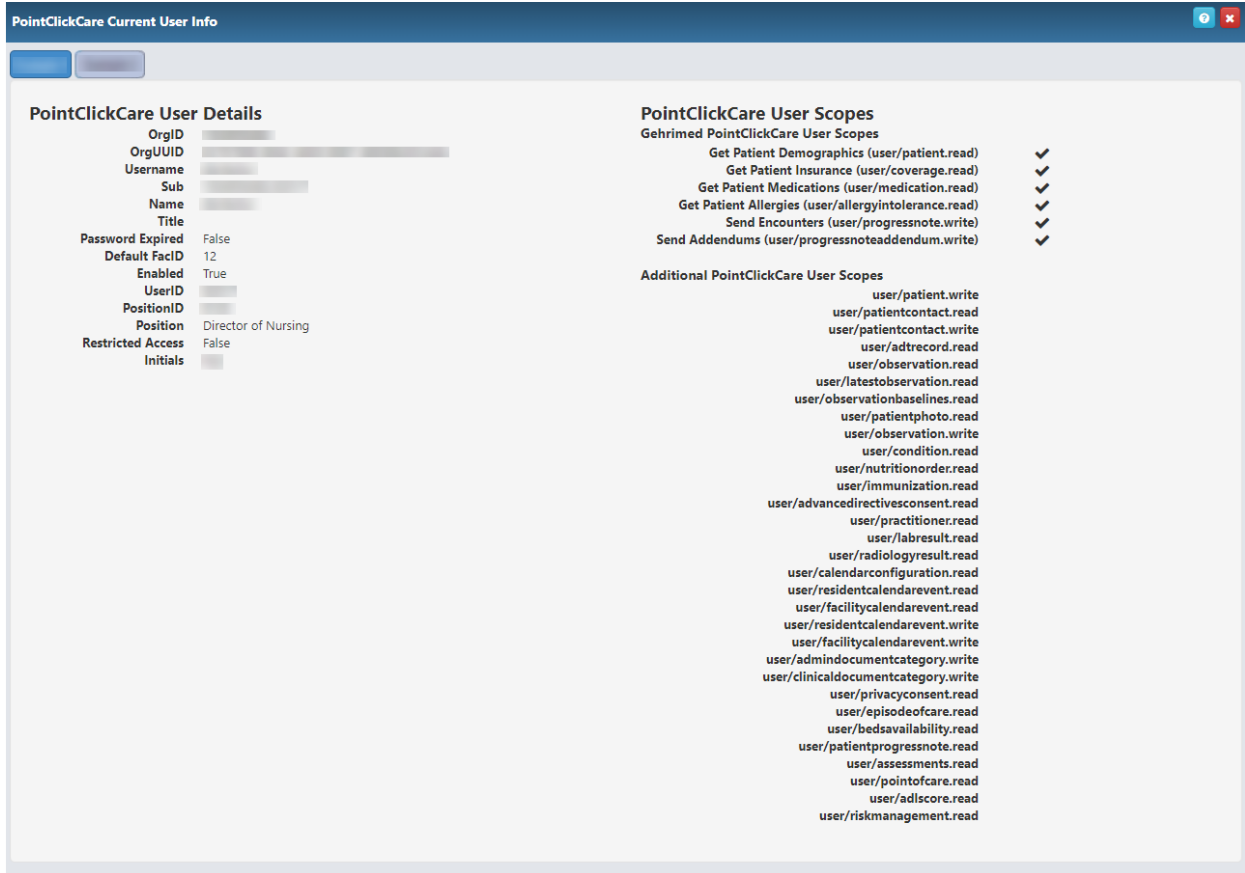

PointClickCare OpenAPI Permissions

Users of the GEHRIMED PointClickCare integration may now view their PointClickCare account scopes in GEHRIMED. Using this feature the PointClickCare user may alert their PointClickCareAdministrator to missing or incorrect scopes they need to utilize the PointClickCare OpenAPI.

To view your scopes, select the **PointClickCare User Info** option in the User Options:

Upon selection the PointClickCare User Info window will be displayed:

PointClickCare Current User Info

PointClickCare User Details

This window displays the PointClickCare scopes specific to GEHRIMED users and associates a check or X to confirm or deny whether they hold those permissions.

An additional list of all other PointClickCare scopes is displayed as well, but these are not relevant to the GEHRIMED user.
