Patch Notes – Jan. 06, 2020

Known Issues

- A bug has been identified in the RVU Dashboard that causes CPT codes to appear doubled. We are investigating this issue.

Issues Addressed

- A bug prevented some ICD10 Codes from being transmitted to billing integrations. This error has been corrected and ICD10 codes will now successfully transfer to billing integrations.
- After the first of the year, users were unable to manage or assign their 2019 Quality Measure Strategies. This issue has been corrected and you may access and modify your 2019 strategies.
- Prescriber Agents may now choose the "Manage" option on the Pending Prescriptions / Refills window in GEHRIMED.
