

Release Notes – Feb. 2020

Issues Addressed

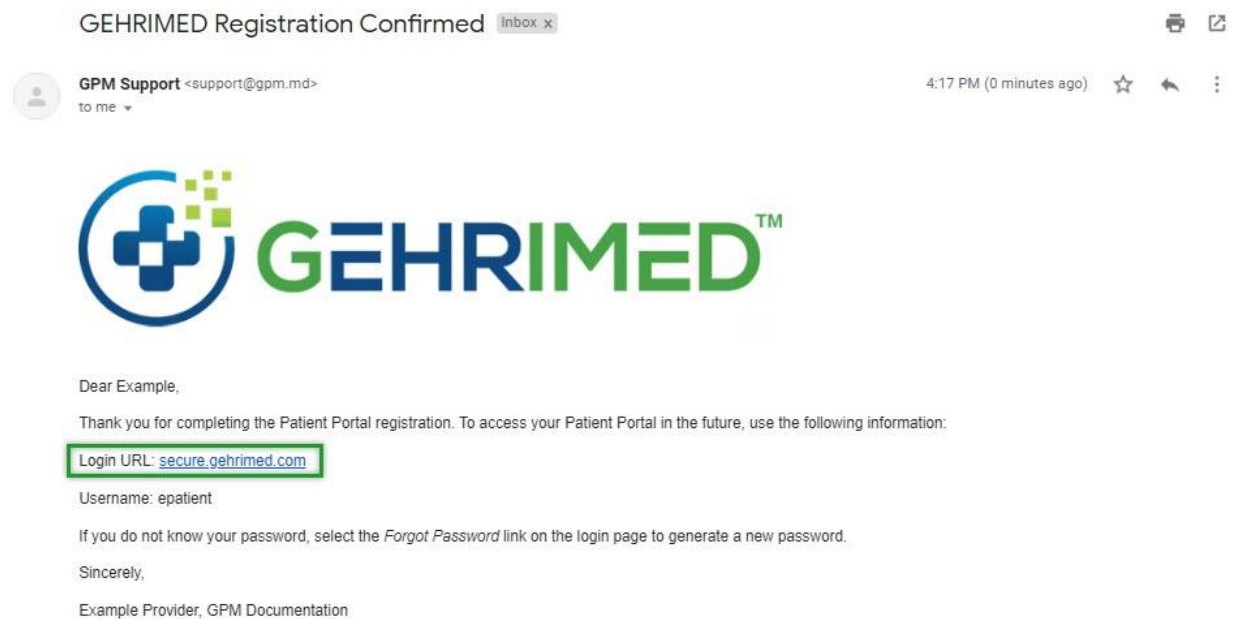

- A bug prevented the Primary Admitting Diagnosis status from being associated with a problem coded added using the options in the "Add All Codes + Assessments from Previous Encounter" drop-down. This issue has been corrected, and the Primary Admitting Diagnosis status will now appear as expected.
- Custom RVU entries will no longer display twice on the Manage Custom RVUs window. This bug only affected the display of Custom RVUs.
- A bug caused DrFirst access to be disabled in some cases when the user profile was updated. This issue has been corrected.
