

Patch Notes – Feb. 27, 2020

Issues Addressed

- The frequency of the PointClickCare Integration encounter push queue has been increased from 15 minutes to 5 minutes. Providers signing encounters for patients linked a PointClickCare patient record should see encounters push to PointClickCare faster.
- The View Deliveries - PointClickCare Window now includes an "Addendum Date" Column, enabling providers to identify Addendums pushed to PointClickCare.

Encounter	Patient	Signed	Requested By	Date of Service	Added	Addendum Date	Status	Sent	PointClickCare ID
