

## Upcoming Release – March 2020

### Overview

A GEHRIMED feature release is planned for late March 2020. This release will include changes to the way usernames and patient names are displayed, improved search results around names, and enabling users with administrator privileges to delete signed encounters.

### Username, Patient Names, and Patient Preferred Names

Username and Patient Names will now be displayed in the “LastName, FirstName” format throughout GEHRIMED.

Additionally, you may now record a patient’s preferred name in the patient details. The patient’s preferred name will be displayed in the Patient Record and in any encounters for the patient.

### Delete Signed Encounters

GEHRIMED user with administrator privileges may now delete signed encounters in GEHRIMED. Users will be required to elevate their login and enter a reason for deletion that will be stored in the GEHRIMED audit trail.
