Feature Enhancements

Telehealth Modifier

For groups utilizing the TeleHealth CPT Modifier (95) in GEHRIMED, the modifier may now be toggled as on or off by selecting the  icon associated with a CPT Code in an encounter.

When enabled, the modifier will appear as green:

The screenshot displays the patient encounter interface in GEHRIMED. At the top, patient information is shown: Patient: EXAMPLE PATIENT L, DOB: 09/05/1946 (73 yrs), Insurance: MEDICAID, Facility: EXAMPLE FACILITY 1 SNF, Encounter ID: 3073298, DOS: 12/13/2019, Visit: None, and Template: Example Template [Documentation Group Template]. Below this, there are buttons for 'Select smoking status', 'ACO', and 'Preview and Sign Encounter'. The CPT Codes section is visible, showing a search bar and a list of codes. The code 99305 is highlighted, and the TeleHealth Modifier (95) is shown as a green icon, indicating it is enabled. The Problem List section is also visible, showing a search bar and a list of problems, including 'Bitten by duck' and 'Influenza vaccination administered at current'.

Additionally, the TeleHealth Modifier in GEHRIMED has been updated to read: "Synchronous telemedicine service rendered via a real-time interactive audio and video telecommunications system"

Quality Measures

Quality Measure #1: Diabetes: Hemoglobin A1c (HbA1c) Poor Control (>9%) is now available for use in GEHRIMED. Please note that there have been significant changes to the eligibility of this quality measure for 2020, most notably the removal of many CPT codes, including 99304, 99305, 99306, 99307, 99308, 99309, 99310.

Additionally, there are a number of exclusions for patients between the ages of 66 and 75. Please consult the CMS specifications on our Zendesk MIPS Marketplace here, <https://support.gehrimed.com/hc/en-us/categories/360000146388-MIPS-Marketplace>

External ID for Billing Integration Patients

When a Billing Integration is active for a patient in GEHRIMED, the identifying ID number for the patient will display on the Patient Details:
