

## Issues Addressed

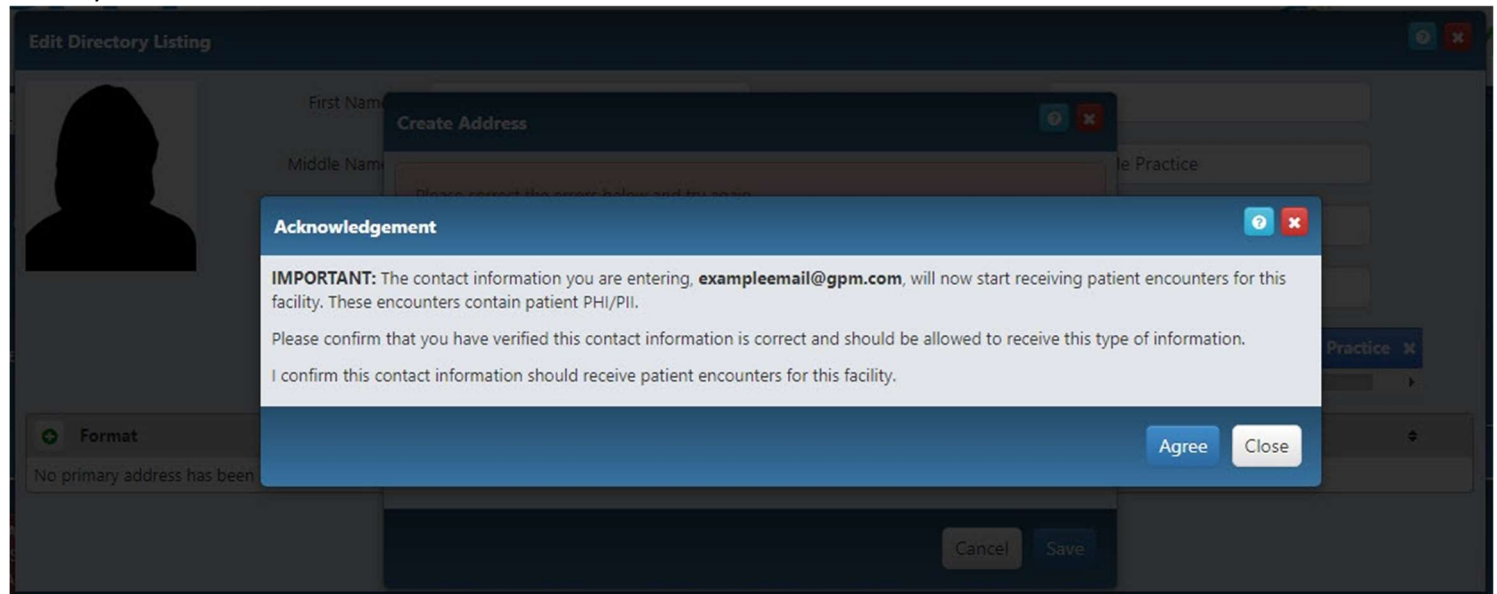

A GEHRIMED bug that caused batch CCDAs generation to fail has been corrected. When an error causes a CCDAs inside the batch to error, the batch generation will now continue, skipping the error record.

A Null Date of Birth will no longer cause a CCDAs file to error.

## Feature Enhancements

### Directory Listing PHI Warning

Adding or editing directory listings will now prompt a warning and confirmation before save to ensure notification of PHI delivery:

## Encounter Primary Billing Diagnosis Restriction

GEHRIMED Administrators now have access to a new option on the group details that places a restriction on the ICD codes that may be added to the Encounter's Primary Billing Diagnosis:

The screenshot shows the 'Edit Group' interface with the following fields and options:

- Group Name: GPM Documentation
- Group Contact: [Empty]
- Phone: [Empty]
- Fax: [Empty]
- Transcription Group: Select a transcription group
- Accountable Care Organization:
- Active group:
- Group Type: Live
- Default Encounter Signing Action: Electronically Sign And Close
- Prevent Encounter from Being Signed if Non-Primary Billing Code is in Primary Diagnosis Position:  (highlighted with a green box)
- Use Unstructured Document:

Buttons at the bottom: Custom CPT Codes, CPT Modifiers, Cancel, Update

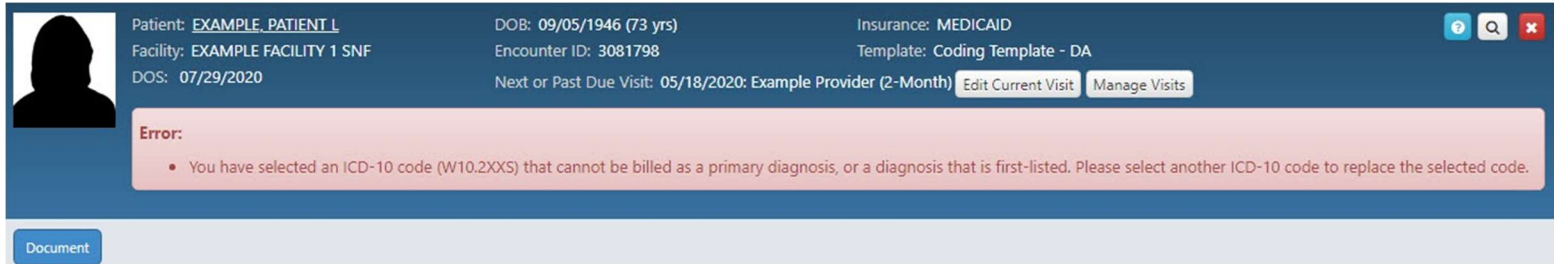

*NOTE: This feature is enabled by default.*

Once enabled, your providers will be unable to sign an encounter if a non-primary diagnosis code (denoted by an icon and determined by Intelligent Medical Objects©) is listed as the Primary Billing Diagnosis:

The screenshot shows an encounter assessment form with the following details:

- Assessment: Add All Codes + Assessment from Previous Encounter
- Primary Billing Diagnosis: W10.2XX5 (with a restriction icon) - Fall (on)(from) incline, sequela
- Other Diagnosis: E880.9 - Dementia associated with other underlying disease

# Release Notes

Patient: EXAMPLE\_PATIENT\_L    DOB: 09/05/1946 (73 yrs)    Insurance: MEDICAID  
Facility: EXAMPLE FACILITY 1 SNF    Encounter ID: 3081798    Template: Coding Template - DA  
DOS: 07/29/2020    Next or Past Due Visit: 05/18/2020: Example Provider (2-Month)    [Edit Current Visit](#)    [Manage Visits](#)

**Error:**

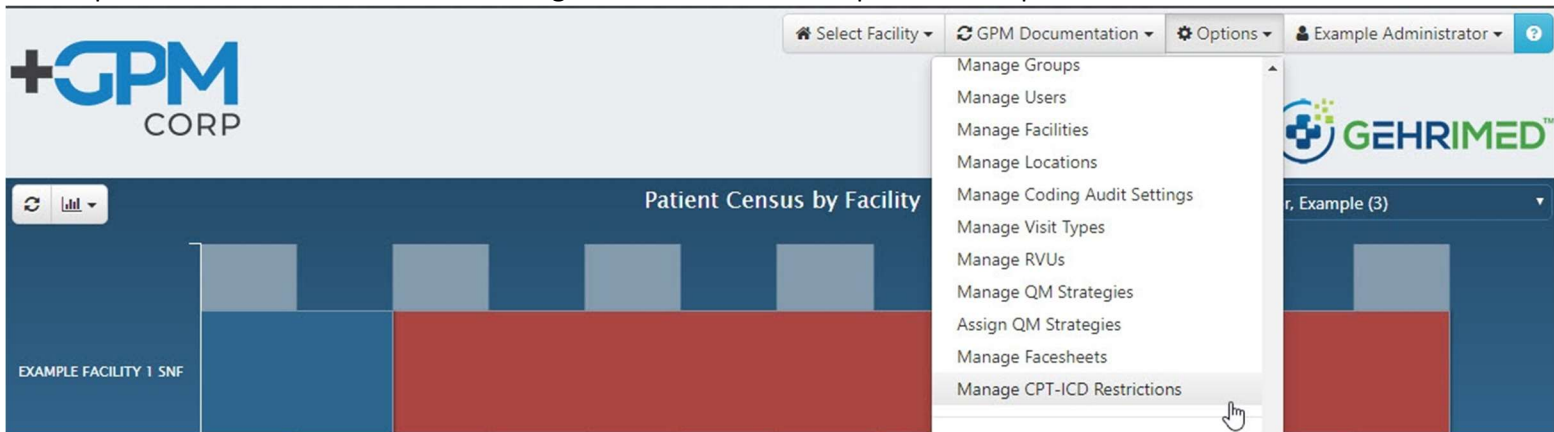

- You have selected an ICD-10 code (W10.2XXS) that cannot be billed as a primary diagnosis, or a diagnosis that is first-listed. Please select another ICD-10 code to replace the selected code.

## Custom ICD and CPT Restrictions

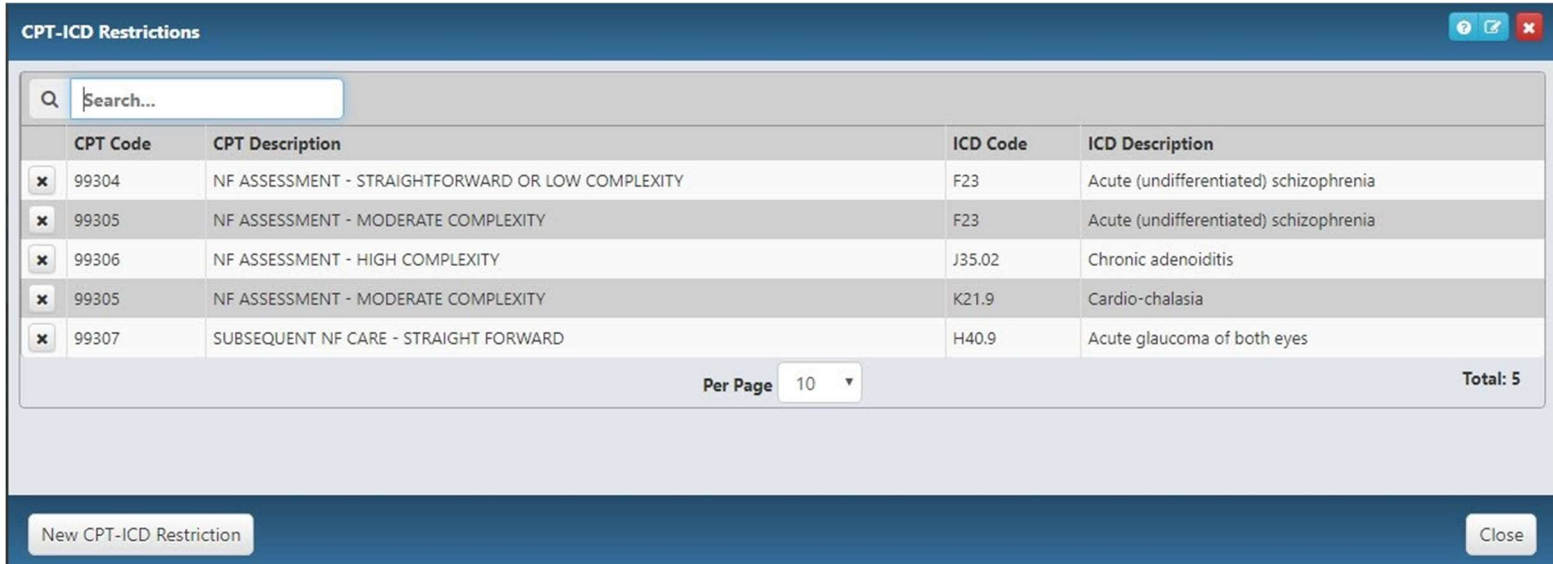

CPT-ICD Restrictions may now be created by GEHRIMED Administrator users. When a CPT-ICD Restriction is active for a group, providers are warned that the ICD Code cannot be the Primary Billing Diagnosis on an encounter.

To setup CPT-ICD restrictions select the **Manage CPT-ICD Restrictions** option in the Options Menu:

The screenshot shows the GPM Corp software interface. The top navigation bar includes 'Select Facility', 'GPM Documentation', 'Options', and 'Example Administrator'. The 'Options' menu is open, listing various management options. The 'Manage CPT-ICD Restrictions' option is highlighted at the bottom of the menu. The background shows a 'Patient Census by Facility' chart with a bar for 'EXAMPLE FACILITY 1 SNF'.

Select **New CPT-ICD Restriction** button to launch the Create CPT-ICD Restriction window:

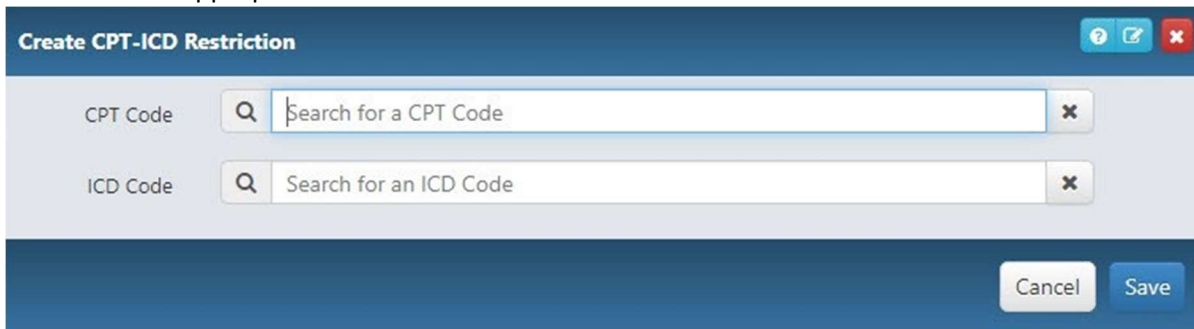

**CPT-ICD Restrictions**

Search:

CPT Code	CPT Description	ICD Code	ICD Description
<input type="checkbox"/> 99304	NF ASSESSMENT - STRAIGHTFORWARD OR LOW COMPLEXITY	F23	Acute (undifferentiated) schizophrenia
<input type="checkbox"/> 99305	NF ASSESSMENT - MODERATE COMPLEXITY	F23	Acute (undifferentiated) schizophrenia
<input type="checkbox"/> 99306	NF ASSESSMENT - HIGH COMPLEXITY	J35.02	Chronic adenoiditis
<input type="checkbox"/> 99305	NF ASSESSMENT - MODERATE COMPLEXITY	K21.9	Cardio-chalasia
<input type="checkbox"/> 99307	SUBSEQUENT NF CARE - STRAIGHT FORWARD	H40.9	Acute glaucoma of both eyes

Per Page: 10 Total: 5

Search for the appropriate CPT-ICD combination:

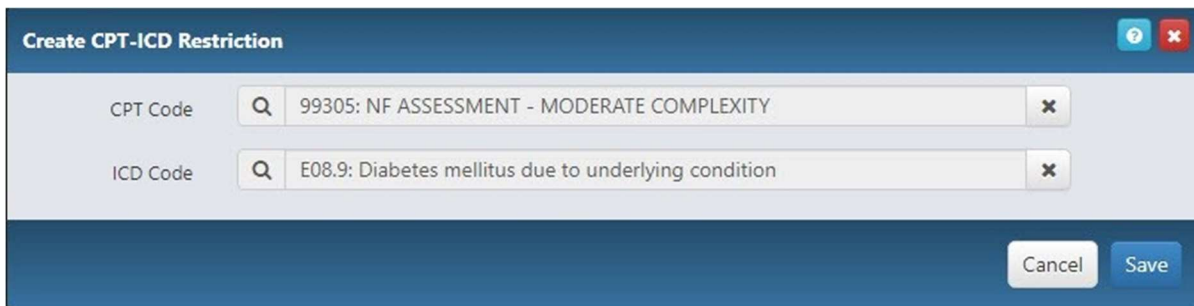

**Create CPT-ICD Restriction**

CPT Code:

ICD Code:

Select the **Save** button to add the CPT-ICD Code Restriction.

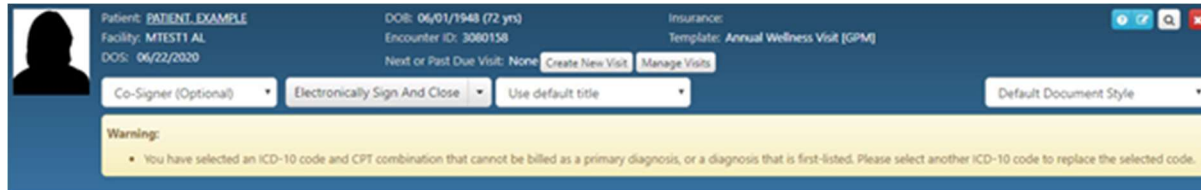

**Create CPT-ICD Restriction**

CPT Code:

ICD Code:

Once you have established a CPT-ICD Combination(s), your providers will receive a warning when selecting the **Preview and Sign** option:

# Release Notes

The screenshot shows a software interface with a patient information header. The header includes fields for Patient (PATIENT\_EXAMPLE), Facility (MTEST1 AL), DOS (06/22/2020), DOB (06/01/1948 (72 yrs)), Encounter ID (3080158), Insurance (Annual Wellness Visit [GPM]), and Template (Annual Wellness Visit [GPM]). Below the header are three dropdown menus: Co-Signer (Optional), Electronically Sign And Close, and Use default title. A yellow warning box is displayed at the bottom of the interface, containing the text: "Warning: You have selected an ICD-10 code and CPT combination that cannot be billed as a primary diagnosis, or a diagnosis that is first-listed. Please select another ICD-10 code to replace the selected code."

*Note: Providers are not prevented from signing the encounter.*
