Issues Addressed

The GEHRIMED application will now make use of the entire screen when launched on the iPad Pro.

Pain Level and Blood Sugar may now be dictated using Dragon on patient record's vitals entries.

A bug that prevented users from printing on the Patient Census when using the iPad launcher has been corrected.

Issues with the display of the date picker on the iPad Launcher have been corrected.

Feature Enhancements

iPad Launcher Update
The iPad Launcher has been updated to ensure the automatic keyboard focuses correctly when opening an encounter. You may download the launcher update when convenient.
To Perform manual updates:

1. Open the App Store:

App Store

2. Tap the Updates button:

Updates

3. Locate the GEHRIMED App and select **Update** to update the app to the most recent version.
