

Issues Addressed

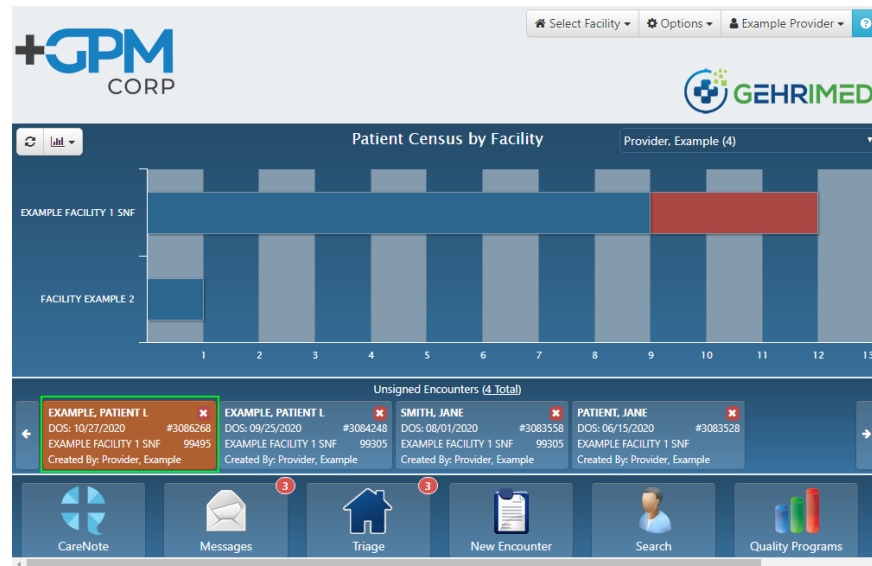

User feature icons will no longer display after the end date of the feature subscription.

Enhancements have been made to increase tolerance of network disruption while editing an encounter, which sometimes caused the encounter to “freeze.”

Feature Enhancements

Chronic Care Management Encounters

When a Chronic Care Management (CCM) CPT code is added as the primary CPT on an unsigned GEHRIMED Encounter, the record will appear as orange on the unsigned encounter ribbon:

This feature enables your clinicians to easily identify CCM encounters and update them as needed throughout the month.

Release Notes

iPad Launcher Update

The iPad Launcher has been updated to ensure the automatic keyboard focuses correctly when opening an encounter. You may download the launcher update when convenient.

To Perform manual updates:

1. Open the App Store:

App Store

2. Tap the Updates button:

3. Locate the GEHRIMED App and select **Update** to update the app to the most recent version.

Scan Documents

GEHRIMED now enables the user to utilize the "Scan Documents" feature when adding new attachments to the Patient Record

Release Notes

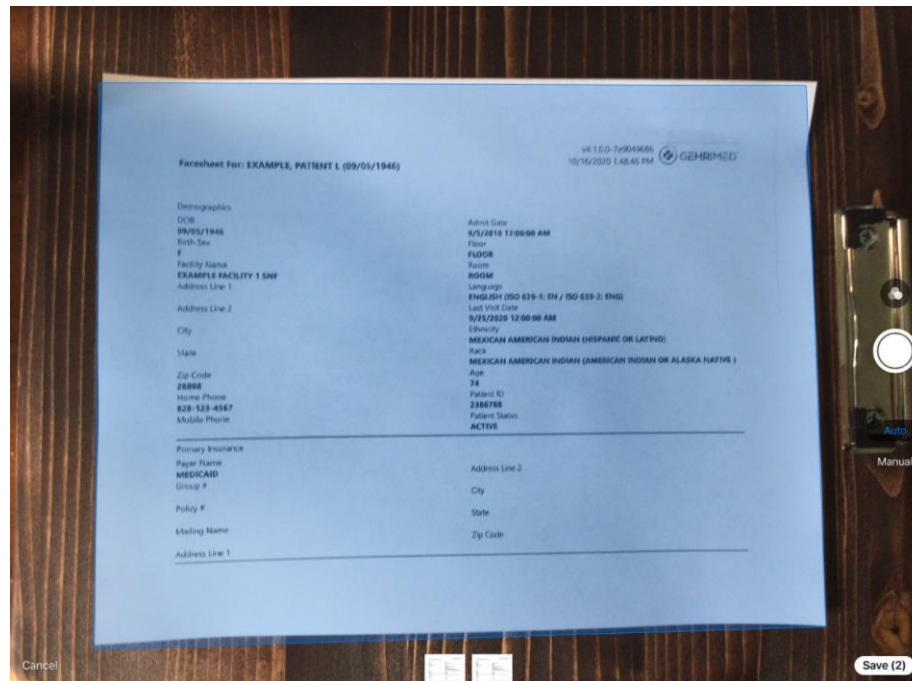

New Attachment for Patient: EXAMPLE, PATIENT L

Description

Attachment no file selected

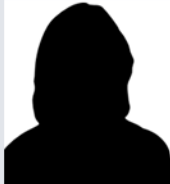

Attachment Type mu Patient

Utilizing the feature you can capture an image or images with your iPad's camera, and upload them directly to GEHRIMED:

The scanned image or images will be saved as a .PDF attachment on the GEHRIMED Patient record:

Patient Census

The GEHRIMED Patient Census can now display up to 1000 Patient records.

Additionally, an option to "Exclude Outpatients" has been added to hide records that have an Outpatient status in PointClickCare.

The screenshot shows the GEHRIMED Patient Census interface. At the top, there is a date filter set to 10/02/2020, a dropdown for 'Physician, Example', and a dropdown for 'EXAMPLE FACILITY - 44'. There are also 'Options', 'Help', and 'Close' icons. Below this is a navigation bar with tabs: 'Scheduled', 'Provider Census', 'Facility Census' (selected), 'Facility Discharged', and 'Facility Feed'. A 'Print' button is on the right. A settings menu is open, showing two options: 'Include Test Patients' (unchecked) and 'Exclude Outpatients' (checked). The main table has columns: 'Location (Unit/Room/Bed)', 'Patient', and 'Date of Birth'. The table contains four rows of patient data.

Location (Unit/Room/Bed)	Patient	Date of Birth
Outpatient	Abernathy, Lettie (69 / MALE)	5/23/1951
Outpatient	Abrams, Sheree Ashlea (87 / MALE)	7/14/1933
A85835C5- / 428...	Ackerman, Lacreasha Mitch (92 / FEMALE)	9/30/1928
96BB191D- / 108...	Adair, Catherin (94 / FEMALE)	4/12/1926

The Outpatient designation is set by the facility. Excluding Outpatients from your results will not impact any existing connections between the PointClickCare and GEHRIMED patient records.
