# Release Notes

## Issues Addressed

Several issues in the GEHRIMED launcher have been corrected to prevent launcher crashing and improve performance.

## Feature Improvements

### Launcher Updates

The GEHRIMED Windows Launcher application has been updated to improve user experience and correct a number of issues around GEHRIMED crashing or requiring users to uninstall and then reinstall the GEHRIMED Launcher application.

*NOTE: This launcher only applies to Microsoft Windows users. iPad and MacOS users are not impacted.*

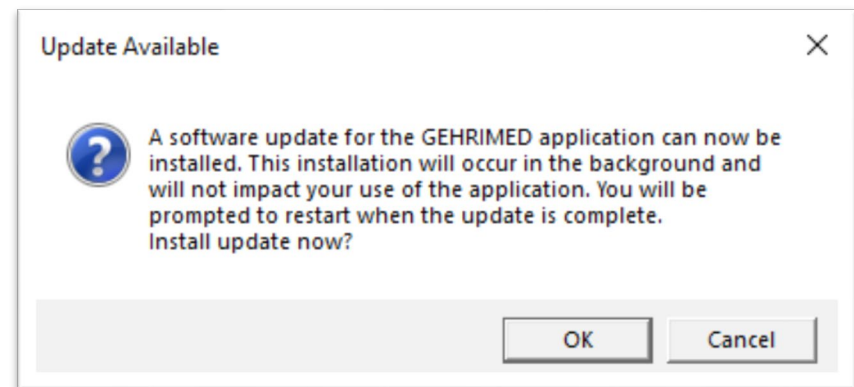

### Updating the GEHRIMED Launcher

When a GEHRIMED Launcher update is available, a prompt will appear when the application is launched. Updates can be optional or, more infrequently, mandatory to install.

### Optional Updates

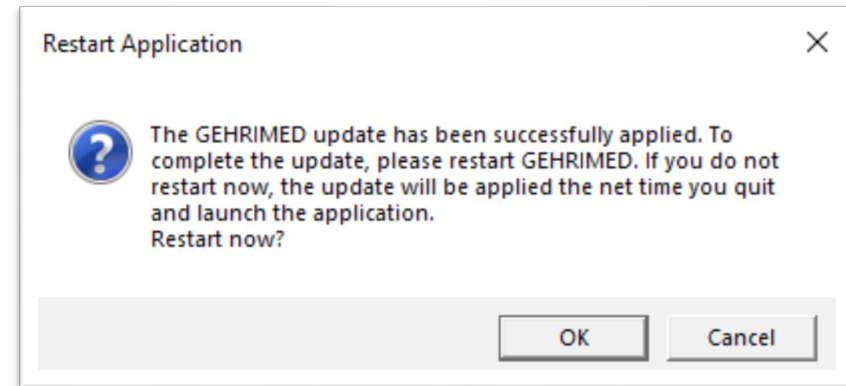

Optional updates will prompt the following message:

Users may choose to decline the update, after which they will be prompted to update again the next time they launch the application.

# Release Notes

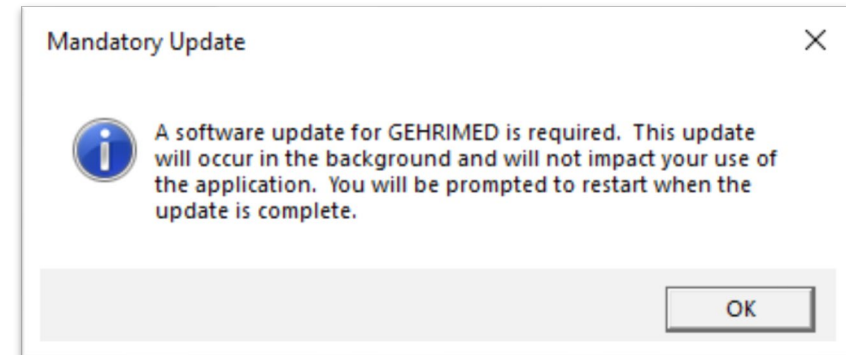

Once the update has been successfully installed in the background, a restart of the of the application is required. You will be prompted to restart:

### Mandatory Updates

Some GEHRIMED Launcher updates will not be optional, particularly if your GEHRIMED Launcher is several versions out of date. If an update is mandatory, the following message will display:

The update will run in the background, and users will receive the prompt to restart the application once it is complete
