

## Release Notes – August 25, 2021

### Feature Enhancements

#### 2021 MIPS Dashboard Updates

- The MIPS Dashboard, accessed via the Quality Programs button from the GEHRIMED home screen, has been updated to reflect 2021 category weights. Specifically, Quality now displays as 40% of the total MIPS score and Cost displays as 20% of the total MIPS score.
- The Improvement Activities MIPS category has been updated with the list of 2021 activities. Users may select their 2021 activities any time between now and December 31, 2021. The IA category is still an attestation category and has a 90-day duration. If reporting as a group, 50% of the group must complete an activity for a group to earn credit for it.
- CMS provided updated Quality Measure benchmarks for every quality measure in the benchmark file. GEHRIMED Quality scoring now reflect those updates.
- The description for Promoting Interoperability measure PI\_HIE\_4 has been updated in GEHRIMED based on its 2021 CMS specifications. This measure now reads, "Support Electronic Referral Loops by Receiving and **Reconciling** Health Information."

#### New Standard Facility Encounter Delivery Methods Report

This new report provides both a summary and a detailed view of how GEHRIMED client partner facilities receive encounters from GEHRIMED. The various methods include fax, email, CareTeam, and PointClickCare. This report will run daily beginning on 8/30/2021 for all customers who have at least one facility enabled for CareTeam.
